

TrueNute Molybdate

Thank you for your purchase of **TrueNute Molybdate!**

It takes very little Molybdate for your system. For 1000 gallons, you will only need 0.25 grams per month (that is 1/4 of a gram). For 100 gallons 0.025 grams per month.

Simple as that, just a tiny pinch as most of us can't measure out 0.025 grams.

It is best to have your water and plants tested on a regular basis to insure your Molybdate levels are at the correct.
